

## Vilene® Bias Tape – for all Curved and Bias-Cut Edges

- Versatile use, for garments, home textiles and soft furnishings
- For use on all curved and bias-cut edges
- No stretching of edges thanks to the chain stitch
- Flat and soft finish for rolled or hemmed edges

# Vilene® Bias Tape – for all Curved and Bias-Cut Edges

**Vilene Bias Tape** is a soft, iron-on, stitch-reinforced bias-cut tape. The tape is 12 mm wide and has a run of chain stitches 4 mm from the edge.

**Vilene Bias Tape** is especially suitable for fusing curved and bias-cut edges in garment construction on necklines and armholes, for home textiles and soft furnishings, for bias-cut curtains, swags and tails.

The tape is ironed on so that the 8 mm faces the fabric edge and then stitched closely behind the run of chain stitches where necessary.

The run of chain stitches provides stability and thus prevents stretching of the fabric edge during further handling.

The turned-over edges remain invisible and the seams are flat and soft.

We recommend making a small test sample before using overall.

Fusing and care instructions:

- Set the iron to wool  • Press on firmly for 8 seconds each step • Washable and dry-cleanable  

Vilene Bias Tape is available in White and Charcoal.
